

FILL THIS SECTION WITH BI-COLUMN TOC USING TCOL BOX

Contents			
1 Logic	1	4.5 Infinite Sum	31
1.1 Propositions	1	5 Probability	32
1.2 Propositions	1	5.1 Events and Probability Space	32
1.3 ZFC Axioms	2	5.2 Conditional Probability	33
1.4 Induction	4	5.3 Independence	34
2 Number System	4	5.4 Random Variable and Distributions	34
2.1 Factors	6	5.5 Expectations	35
2.2 Base Systems	6	5.6 Variance	35
2.3 Cyclicity and Last Digits of a large Number	6	5.7 Random Walks	36
2.4 Euclid's Algorithm	9	6 Statistics	37
2.5 HCF, LCM	15	6.1 Descriptive Statistics	37
3 Graph Theory and Structures	15	6.2 Measures of Central Tendency	38
3.1 Graphs and Digraphs	17	6.3 Measures of Variability	38
3.2 Representation of Graphs	17	6.4 Correlation	38
3.3 Isomorphism	18	6.5 Inferential Statistics	38
3.4 Colouring and Paths	19	7 Linear Algebra	39
3.5 Tree	19	7.1 Vector Spaces V	39
3.6 Plane Graph	20	7.2 Matrices	41
3.7 Directed Graphs	20	7.3 Systems of Linear Equations	42
3.8 Relations and Partial Orders	21	7.4 Linear Transformation	46
4 Counting	23	8 Applied Linear Algebra	47
4.1 Summation and Asymptotic	23	8.1 Matrix Computations and Applications	47
4.2 Recurrence	28	8.2 Matrices from the context of their Application	48
4.3 Cardinality Rules	29	8.3 Calculus For Linear Algebra Applications	51
4.4 Generating Functions	30	8.4 Applied Machine Learning	51
